

# 8.1. INTERLINE AGREEMENTS BETWEEN CARRIERS

## 8.1.1. GENERAL

Interline transportation is mostly governed by the Standard Interline Traffic Agreement-Cargo of IATA, or alternatively by traffic agreements concluded from carrier to carrier, on a purely bilateral basis.

### a. IATA's Standard Interline Traffic Agreement - Cargo

(hereafter referred to as "the Agreement")  
The Agreement, which is available to IATA Members and, subject to certain conditions, to non IATA Members, includes acceptance of other concurring parties' AWBs and adherence to the Cargo handling procedures set forth in the applicable IATA Resolutions.

It is to be noted that the Agreement is only in effect between the participants which have concurred to be in agreement with each other. In other words, the Agreement is NOT automatically in effect between all its participants, and this should be taken into consideration before issuing an AWB to cover an interline carriage.

The information related to the Agreement is published as follows:

#### Section 1.4.1., 1.4.2., 1.4.3. and 1.4.4.

Which should first be consulted. It contains a complete list of carriers with their full names together with their prefix numbers, two character and three letter designators.

Carriers that have joined the Agreement have a #-sign behind their respective names in section 1.4.1., 1.4.2., 1.4.3. and 1.4.4.

#### Section 8.1.2.

Lists all TACT Participating Carriers in alphabetical order (in so far as they are party to the Agreement), their name being followed by the two-character designator of all other carriers with which the Agreement is in effect.

### b. Traffic agreements concluded on a bilateral basis

These, in so far as they are published by the Participating Carriers of this Manual, can be found in section 8.1.3.
